HW1 LLM Report

For HW1, neither of our group's members utilized any sources outside of the Lab videos provided for this class. We specifically referenced lab videos 6, 7, and 8, as they held the guides for implementing ammo, health, targets, hazards, and UI menus, all of which were required for this homework assignment.

We did not feel the need to utilize AI, website, or other outside sources due to the relative simplicity of the assignment, as well as the clarity of the Lab video instructions. There was simply nothing that was required of us for this assignment that resulted in us needing outside assistance.
